

ABSTRACT ON MINOR PROJECT

ACADEMIC ONLINE REGISTRATION

Guided By

Prof. Priyabrata Sahu

ABSTRACT:

In this digital era, where everything is in our fingertips, we create a Web Application where we replace the old fashioned fee collection and registration of the subjects for the semester. In this Web Application, the student has to upload the required documents for the examination section, accounts section, and hostel section and he/she will also be able to do the registration for the semester/year. The person in charge of the above sections will only approve the student's fee receipt only if the transaction id's are matched by the web application with the details given by the bank.

In this Web Application, it saves the time of the person in charge of the sections to do the work effectively and efficiently. In this crucial moment of environmental crisis, we can save a lot of paper being used.
